

2012 Spring Drive-in Workshop for All Career & Technical Education Faculty

INCREASING LEARNING AND STRENGTHENING TEACHING THROUGH STRENGTH-BASED EDUCATION

When: Friday, April 13, 2012, 10 a.m. to 2 p.m.

Who: The strengths-based assessment offers insight into the student's most effective behaviors and talents. The cognitive assessment provides information about how the student perceives and organizes information.

Where: Johnson County Community College, Regnier Center, RC 101A

Why: Interested in explaining the how and why learning takes place in your classroom? This workshop will provide the participants with the same experience as the students in our classroom. Before attending, participants will take the Clifton StrengthsFinder 2.0, while the Gregorc Style Delineator will be given during the workshop. These tools have strengthened learning and collegiality in our classrooms. Discussion and activities will center on these tools, their use and usefulness, and concrete examples of how they have been and can be used in class.

Activities: Participants will need to complete the StrengthsFinder Assessment before attending the workshop and bring a copy of their strengths assessment report to the workshop. JCCC will provide participants with the strength code and instructions on how to take the strengths assessment after the participants have registered for the workshop.

Registration: \$65 for KCWE member institutions
\$90 for non-KCWE institutions

Registration Deadline is **Tuesday, April 10**. Pre-register for the workshop by clicking on the link below and supplying your name, institution, and workshop. Registration is complete upon payment—a PO number or a check made payable to JCCC (identify KCWE workshop). Click on the link below for registration information:
